🔗 My Portfolio

Objective

A passionate Full-Stack Developer who loves building scalable web applications with **ASP.NET** and modern front-end tech. I'm all about creating efficient solutions that help businesses grow. I'm always looking to learn new things and keep improving my skills, especially when it comes to **.NET** development.

Education

Faculty of Management

09/2022 – 08/2026

Modern University for Technology & Information [🔗](#)

Cairo, Egypt

Major: Management Information System (MIS)

Experience

ASP.NET Developer

10/2024 – 05/2025

Digital Egypt Pioneers Initiative - DEPI [🔗](#)

Cairo, Egypt

- Developed a strong understanding of **C# programming** and the **.NET framework**, including OOP principles and application structure.
- Built real world **ASP.NET MVC web applications**, implementing models, views, and controllers to create dynamic user experiences.
- Gained hands on experience with **Entity Framework (EF)** for database operations and **LINQ** for efficient data queries.
- Strengthened skills in **problem solving, debugging, and team collaboration**, especially through project based learning and version control.

Future Employee for the Digital Era

07/2023 – 09/2023

CIB Bank [🔗](#)

Cairo, Egypt

- Gained foundational knowledge in **FinTech** concepts.
- Developed resilience skills through practical exercises and workshops.

Courses

Back-End Development using PHP and MySQL [🔗](#)

2024

Mahara-Tech

Cairo, Egypt

- Gained expertise in PHP for building dynamic, interactive web applications.
- Wrote complex SQL queries to handle CRUD operations and optimize performance.

Front-End Development using HTML,CSS and Javascript [🔗](#)

2024

ITI - Information Technology Institute

Cairo, Egypt

- Gained expertise in creating semantic and responsive web pages using HTML and CSS.
- Built real-world projects, such as portfolio sites and interactive forms, adhering to modern UI/UX principles.

Projects

TechXpress [↗](#)

01/2025 – present

A Full-Stack Ecommerce website

ASP.NET MVC, Entity Framework, SQL Server, Bootstrap/Tailwind CSS Developed a full-featured eCommerce web application with product browsing, user authentication, shopping cart, wishlist, and order management. Integrated session-based cart handling and role-based access for admins and users. Utilized Entity Framework for data persistence and LINQ for query operations. Designed responsive UI for seamless user experience.

You can find more on the **Github Repo here** [↗](#) .

Discord Bot

2025

Music Streaming Bot

Developed a feature-rich Discord bot using Node.js, Discord.js, and DisTube to stream high-quality music with a robust queue system and custom commands. Enhanced user experience through interactive chat features.

More info can be found at github repo: [Kirolos-Nedaa/Discord-Music-Bot](#) [↗](#)

Full stack web development Project

2024

Ecommerce Shopping Website

First application of full-stack web development skills: a functional, responsive e-commerce website.
